

*A new level of cleaning unlocked!*

**Ear Cleaning Worries (especially for children):** Hygiene becomes a task, especially if it is for something as delicate as ears. This can become a serious problem as children usually refrain from getting their ears cleaned. And earbuds are not exactly the safest way to ensure clean ears. Having a device that is safe and even gives a peek inside to check for ear wax or any possible infection, makes the task easier!

**Hygiene Got Upgraded:** There are days when you are in a hurry, but cleaning seems like an add on! We understand and hygiene is unavoidable, hence this device was designed. It makes cleaning like a literal errand on the go!

**2.4Ghz Working Frequency:** The ear microscope has a spectacular range of frequency that culminates at a frequency of 2.4Ghz. This frequency allows for a fluid functioning of the ear camera.

**Ultra Fine 4.5mm Lens:** The ear camera has an ultra fine 4.5mm lens that will allow you to have a crystal clear view of the ear drums and the innate wall of the ear cavity. Besides it gives a much clearer preview of the ear wax covering the walls of the cavity.

**3 Megapixels Endoscope:** Cleansify has a 3 Megapixels endoscope which makes for the best quality of live time shots of the inner ear cavity. This is a top end version of endoscopes and makes for the perfect ear cleaning tool.

**1080 FHD Camera:** A full definition camera is a great add on for such a device that usually gives out sketchy impressions. This feature will give you shots that are straight away pixels perfect and glitch free!

**3 Axis Gyroscope:** This feature defines the product in its entirety! Gyroscope is a tech that allows for angular orientation or in simpler words allows for angled views as compared to general line of sight!

**300mAh Rechargeable Battery:** A powerful battery that not only empowers the device but also makes it a perfect fit for the long run. In hindsight, the battery strength ensures the wellness and longevity of the device!

**Screw Secured Tip:** The device tip is screw secured and would not detach while in action. Usually the tips are just mounted on the which comes off if extra force is applied. Cleansify will safely do the job.

**Control Via App:** The ear camera can be controlled at the mere ease of an app! The BeBird app can be downloaded from the playstore and explored further. The device works in perfect sync with the app!

**TECHNICAL SPECIFICATIONS :**

- Model** : Cleansify
- Product Code** : POR 1564 (Black)
- Lens Diameter** : 3.5mm
- Battery** : 300mAh
- Battery Life** : 1hrs
- Pixel** : 300W
- Working Freq.** : 2.4Ghz

MRP  
**₹ 2,999/-**

**Get Up and Close**

Peek into the ear dungeons with the aid of 1080p FHD quality camera and get a clear perspective like never before!

Cleansify Other
