

MOBIKE PRIME

Universal Handlebar Phone Mount

User Manual

Product Overview

Mobike Prime is a sturdy and reliable universal phone holder designed for bicycles and motorcycles. It ensures a firm grip on your device while riding, providing convenience and safety on the go.

Key Features

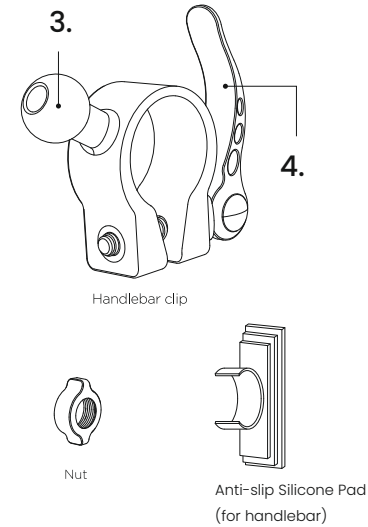

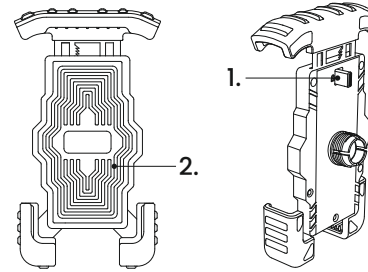

- Universal compatibility for smartphones (4.7" to 6.8")
- Strong and secure grip with anti-slip silicone 360° adjustable viewing angle with universal ball joint
- Durable ABS build for long-lasting performance
- Easy installation on bicycle and motorcycle handlebars.

Specifications

- Product Name: Mobike Prime
- Material: ABS
- Net Weight: 180g
- Applicable Device Size: 4.7 – 6.8 inches
- Handlebar Diameter Compatibility: 0.6 inch – 1.2 inch

Product Components

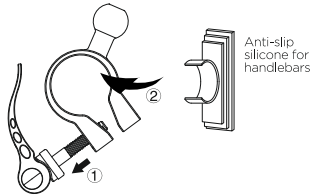

1. Secure Lock Mechanism switch
2. Anti-Slip Silicone Grip Pads
3. Universal Ball Joint
4. Screw Wrench

Installation Guide

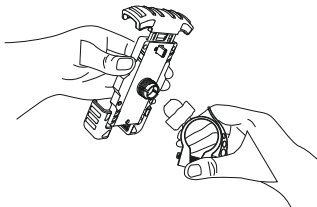

Step 1: Prepare the Handlebar

Place the anti-slip silicone pad inside the handlebar clip according to size. This ensures a firm grip and prevents slipping.

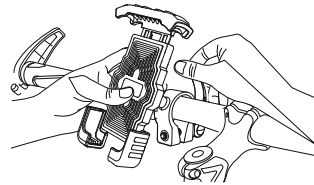

Step 2: Assemble the Mount

Connect the fixed parts of the handlebar mount. Insert the universal ball into the back slot of the bracket. Ensure it fits securely.

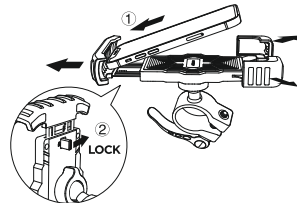

Step 3: Fix the Mount

Attach the clip onto the handlebar. Tighten it using the nut and screw wrench until secure.

Step 4: Mount Your Phone

Place your phone on the holder by pushing the top bracket. Adjust and lock it securely. Use the locking switch at the back for extra stability during rides.

Usage Instructions

- Adjust the viewing angle using the ball joint as per your comfort.
- Ensure the phone is tightly locked before riding.
- Recheck tightness after installation for safety.

Safety & Precautions

- Always ensure the mount is firmly tightened before use.
- Do not exceed the supported phone size range.
- Avoid installing on damaged or irregular handlebars.
- Check the grip periodically during long rides.
- Keep away from children when not in use.
