As A Vacuum

Attach the HEPA filter and the dust compartment at the top, as shown in the image.

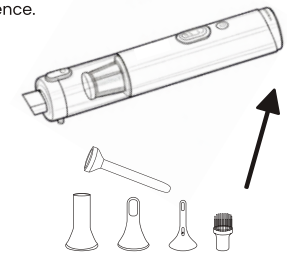

The vacuum attachments can be mounted on top of the dust compartment according to your cleaning convenience.

Ensure that the bin is securely locked before using the device. It is mandatory to attach HEPA filter while using the device as a vacuum to prevent dust particles entering main body.

As A Blower:

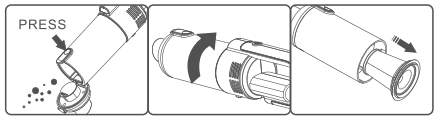

Remove the HEPA filter and dust compartment, and start the device to function it as a blower.

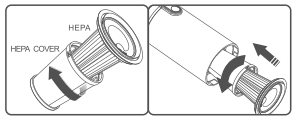

Attach the blower nozzles according to your cleaning convenience.

Cleaning

- Turn OFF the device before cleaning.
- Empty the collected dust from the dust compartment by pressing the push button.
- Remove the dust compartment and HEPA filter by rotating it gently in anti-clockwise direction.
- The dust compartment and HEPA filter can be washed and must be dried completely before next use.
- Do not clean the main body with water, use a cloth to wipe off the dirt.

Charging Instructions

- Device can be charged via charging base and directly through type C charging cable.
- Make sure the device is in proper alignment while charging from the base.
- Use a type C cable to charge directly. Remove the device from charging once it is fully charged.
