Ethernet port:	Support 100M network, adaptive 10/100Mbps broadband.
USB 3.0 port:	Compliant with USB 3.0 specification, transfer rate up to 5Gbps
USB 2.0 port:	Compliant with USB 2.0 specification, maximum transfer rate 480Mbps
SD & TF port:	USB2.0 card reader, support SD/TF card
Audio port:	Support 3.5mm audio output

How to Use

- Ensure your equipment and connection cables are functioning properly before use.

- The USB-C interface supports forward and backward plug-and-play, with no drivers required for the hub.
- When removing the device, follow your system's recommended procedure to avoid data loss or equipment damage.
- Avoid charging other devices through the USB-A interface, as its low current results in slow charging speeds.

Troubleshooting Guide

Issue	Possible Cause	Solution
Product not working properly	Original equipment model not compatible	Verify that your equipment is compatible with the USB-C Hub
Product not working properly	Connection cable or original equipment faulty	Check if the cable and device are functioning normally
Product not working properly	Temporary connection fault	Reconnect or replace the cable/device and try again
Product feels hot during use	Normal heat generation from aluminum alloy shell	The hub may reach about 55°C under full load; within the standard limit of 60°C as per GB4943.1-2011. Safe to use
