Power On & Off

Power On： 【Long press】 Multi-function key for 3 seconds, the LED indicator will flash blue and red.

Power Off： 【Long press】 Multi-function key for 3 seconds, LED indicator stop flashing.

Easy Matching

Make sure your mobile phone, computer or audio device is switched on and within 1 metre;

Activate Bluetooth on your mobile phone or other device and perform a search for Bluetooth devices: MUFFS M5, Click and complete the pairing;

Once successfully paired, the LED will be blue;

After the first successful pairing, the headset will automatically connect to the last mobile phone it has been connected to every time it is switched on, so there is no need to repeat the pairing;

Note: If necessary, please turn off the headsets and repeat the above steps to reconnect.

- Gaming Mode
- Movie Mode

ANC Operation

ANC Button：
- ANC On /Off Transparency mode 【Single press】
- Adaptive noise reduction mode 【Double press】
- Siri or voice assistant 【Long press】

Dual Pairing Connection

Pair and connect the headset to mobile phone A first, and then turn off the Bluetooth function of mobile phone A. Then pair the headset with mobile phone B and turn on the Bluetooth function of mobile phone A. The Bluetooth headset will automatically connect back to mobile phone A (the mobile phone should have the function of automatic connection) or click the Bluetooth headset to manually connect back to mobile phone A. At this time, the headset can be connected to both mobile phones at the same time, so as to achieve the function of connecting two mobile phones with one headset.

Charging

Use a type-C table to charge；

|	
Charging：	Indicator light is always on in red；
Fully charged:	Indicator light off；
Charging time:	~2-2.5hours

Charging Port
*Please use a charger that has passed the national safety certification for charging

Connects using a 3.5mm audio cable

- You can simply use the headset as a wired headset: plug in the 3.5mm audio cable to connect the headset to a PC computer, laptop, or other device and use the headset as a wired headset. (If you want to connect to a mobile phone or other device that does not have a 3.5mm audio connector, you will need to use the appropriate audio converter to do so);

- PC or laptops with Bluetooth capability can also be connected using Bluetooth.

Note： When connecting with a wired audio cable, the Bluetooth connection function cannot be used at the same time.

Audio devices with 3.5mm connectors
Listen Responsibly

To avoid hearing damage, make sure that the volume on your music player is turned down before connecting your headphones.
After placing headphones in/on your ears, gradually turn up the volume until you reach a comfortable listening level.

Noise levels are measured in decibels (dB), exposure to any noise at or above 85 dB can cause gradual hearing loss. Monitor your use; Hearing loss is a function of loudness versus time, The louder it is, the less time you can be exposed to it. The softer it is, the more time you can listen to it.

Use Responsibly

Do not use headphone when it's unsafe to do so-while operating a vehicle, crossing streets, or during any activity or in an environment where your full attention to your surroundings is required.
It's dangerous to drive while wearing headphones, and in many places, illegal because it decreases your chances of hearing life-saving sounds outside of your vehicle, such as another car's horn and emergency vehicle sirens. Please avoid wearing your headphones while driving.
