Thank-you for choosing Portronics. We're happy to help you understand how to use this product. Read on!

## USER MANUAL

### Package Contents :

1. Vayu Lite
2. Multifunction Nozzles
3. User Manual

Long Tapered Nozzle

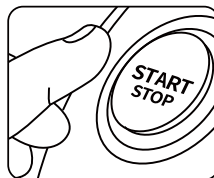

Short Tapered Nozzle

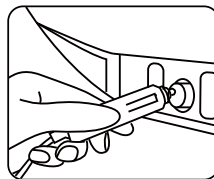

Needle

## OPERATION GUIDE

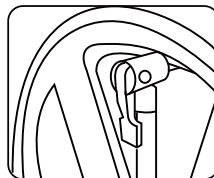

### HOW TO USE

**Step 1**  
Start the car engine.

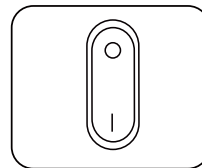

**Step 2**  
Insert the power cord into the 12V cigarette lighter socket. The LED will turn on to indicate power supply being provided to the tyre inflator.

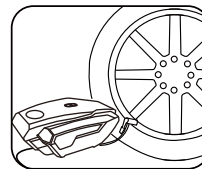

**Step 3**  
Remove the dust cap of the valve, and then connect the air hose to the valve. Make sure the hose and valve of the inflatable are connected tightly.

**Step 4**  
Note: Any damage caused by physical impact, water / liquid, fire, etc. caused by the customer or nature shall not be covered under warranty. Only product design, feature and functionality-related faults can be considered. During the warranty period, this product is only eligible for replacement and not eligible for repair, as per the brand's discretion.

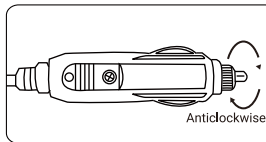

**Step 5**  
Press the power switch to start inflating. When the preset pressure is reached, the inflator will automatically stop.

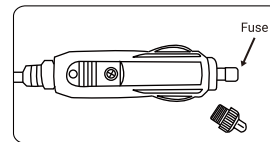

**Step 6**  
Press the power switch again to turn off the appliance after inflation. Disconnect the power cord and the nozzle.

### CHANGE THE FUSE

- It is applicable to vehicle power supply ONLY. Please check the status of the fuse if your appliance fails to start.
- Follow the instructions listed to change the defective fuse to get the appliance back to work.

**Step 1**  
Turn the screw anti clock wise & take off the fuse.

**Step 2**  
Exchange the fuse and then turn the screw back.

### TROUBLESHOOTING

Problems	Possible Reasons & Solutions
The Inflator does not work.	<ul style="list-style-type: none"><li>• Check if the preset pressure is lower than the current pressure.</li><li>• Check if the power cord is connected tightly.</li><li>• Check if the car engine has been started.</li><li>• Check if the glass fuse is damaged.</li></ul>
The Inflation is slow.	<ul style="list-style-type: none"><li>• Check if the air hose and the inflatable are connected tightly.</li><li>• Check if the air hose leaks.</li></ul>
There is air leakage.	<ul style="list-style-type: none"><li>• Check if the inflatable leaks.</li><li>• Check if all connecting parts are connected tightly and ensure the nozzle is screwed tightly.</li></ul>
The appliance works normally, but the current pressure shows 0.	<ul style="list-style-type: none"><li>• Check if the hose is damaged.</li><li>• Low-pressure inflatables like balloons are not measurable by this appliance.</li><li>• When the tire is flat, it takes a little time for the tire pressure to be measurable.</li></ul>
Accessories are missing or damaged	<ul style="list-style-type: none"><li>• Please contact our customer service team.</li></ul>

If you have any other problems, please feel free to contact our customer service team.

### Specifications :

Power	: 120W
Working Voltage	: DC 12V
Max Operating Current	: 10A
Max Working Pressure	: For Tyre Pressure ≤50 PSI
Pressure Measurement Accuracy	: ± 1 PSI
Continuous Working Time	: ≤ 10 Mins
Material	: ABS + Metal

Note: Any damage caused by physical impact, water / liquid, fire, etc. caused by the customer or nature shall not be covered under warranty. Only product design, feature and functionality-related faults can be considered. During the warranty period, this product is only eligible for replacement and not eligible for repair, as per the brand's discretion.
