

VAYU NEO

2-in-1 Corded & Cordless
Mini Tyre Inflator

USER MANUAL

INTRODUCTION

Thank you for choosing Vayu Neo. This portable and easy-to-use inflator is designed to help you accurately inflate car tires, bicycle tires, sports balls, and more—with precision and convenience.

Please read this manual carefully before use to ensure safe and proper operation.

SAFETY INSTRUCTIONS

1. Use the inflator only for its intended purposes.
2. Do not inflate objects beyond their recommended pressure limits.
3. Avoid operating the inflator in extreme temperatures or near flammable materials.
4. Keep out of reach of children to prevent accidental use.
5. Allow the device to cool down after extended use to avoid overheating.
6. Fully charge the battery before using it for the first time.
7. Store the inflator in a cool, dry, and well-ventilated place.
8. Do not expose the device to water or other liquids.

PACKAGE CONTENTS

TECHNICAL SPECIFICATIONS

Product Technology	Corded and Cordless
Product Model	Vayu Neo
Cigarette Lighter Port	DC 12V
Battery Capacity	2000mAhx3
Charging Input	5V 2A

PHYSICAL SPECIFICATIONS

5 BUILT-IN INFLATION MODES

PRESSURE PRE-SET

- To preset your desired tire pressure:
1. Press and hold the "Mode" button to switch the unit (e.g., PSI, BAR, KPA).
 2. Use the "+" or "-" buttons to adjust the pressure value.
 3. Once the desired value is set, wait a few seconds until the numbers stop flashing.
 4. Press the ON button to begin inflation.
 5. The inflator will automatically stop once it reaches the preset pressure.

OPERATION GUIDE

(1) Battery Powered Mode

Please ensure the device is fully charged before use.

(2) Cigarette Lighter Powered Mode

Battery level display :

This icon has three statuses based on the device's battery level: one cell means the pump is < 30% charged, two cells mean 50% charged, and three cells mean the device is fully charged. The battery level icon will flash when the product is charging and stays on when it is fully charged.

TROUBLESHOOTING

Problem	Cause	Solution
Inflator does not start	Battery is low	Charge the battery fully
Inflation is slow	Nozzle not attached properly	Ensure a secure connection
Inflator stops suddenly	Overheating protection activated	Allow it to cool down
