

VOLT BLAST

2-in-1 Car Jump Starter & High-Speed Air Blower

USER MANUAL

PRODUCT OVERVIEW

Volt Blast is a powerful 2-in-1 portable device that combines a high-speed air blower with an emergency car jump starter, making it an essential companion for both everyday cleaning and on-road emergencies. Equipped with a stepless speed control system, it allows precise airflow adjustment for tasks like cleaning cars, keyboards, and hard-to-reach areas. Designed with a compact, ergonomic body, real-time battery display, and Type-C charging, Volt Blast delivers convenience, power, and versatility in one sleek handheld device.

PACKAGE CONTENTS

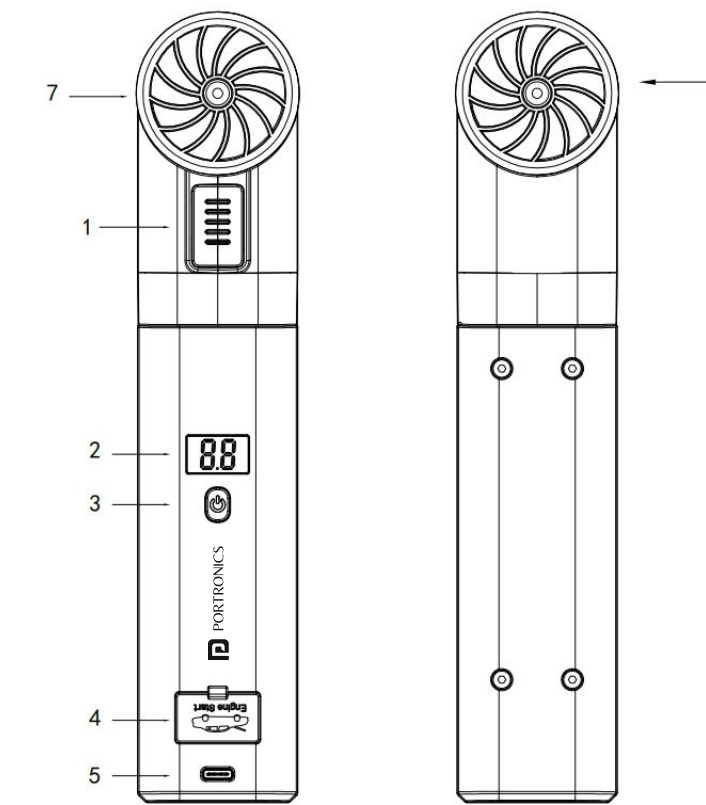

- Volt Blast × 1N
- Type-C Charging Cable × 1N
- Crocodile Clips × 1N
- Blowing Nozzle × 1N
- User Manual × 1N

- Air Inlet
- Air Outlet

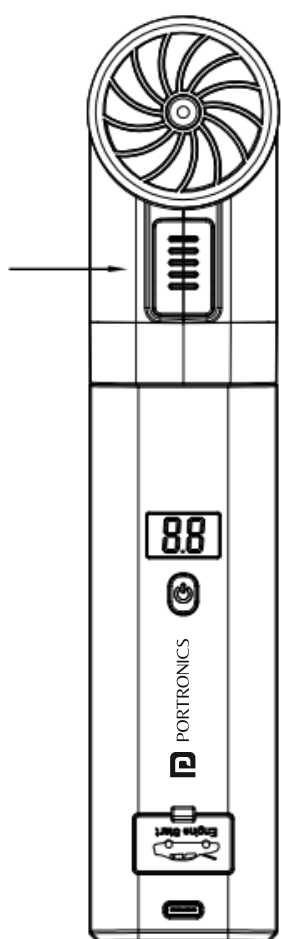

HOW TO USE – AIR BLOWER

- Attach the top head securely.

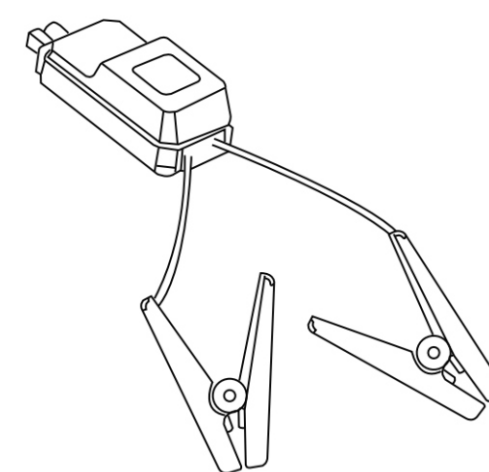

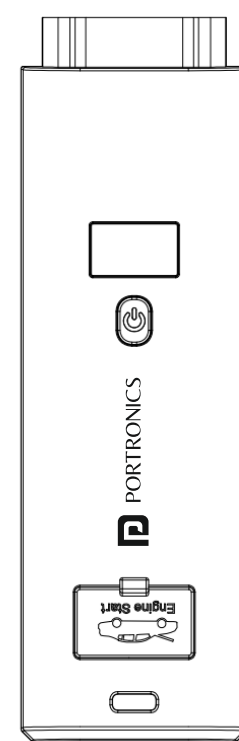

- Press the trigger button to start airflow.

- Adjust speed by pressing lightly (low) or fully (high).
- The device auto shuts off after 30 seconds of inactivity.

HOW TO USE – CAR JUMP STARTER

- Connect the jump starter cable to the jump start port.
- Open your car hood.
- Attach clamps correctly:
 - Red → Positive (+)
 - Black → Negative (–)
- Start your vehicle.
- Disconnect immediately after ignition.

Smart Jump Starter Cable

SAFETY INSTRUCTIONS

USAGE SAFETY

Do not block air inlet/outlet—may cause overheating.
Ensure battery is above 50% before jump starting.
Avoid frequent jump starts; maintain 30 sec gap between attempts.
Do not use if device is overheated.

ELECTRICAL SAFETY

Ensure crocodile clips are properly connected.
Do not exceed output limits.
Avoid using damaged cables.

HANDLING & STORAGE

- Keep away from heat, fire, and water.
- Store in a dry, dust-free environment.
- Charge at least once every 3 months if unused.

IMPORTANT WARNINGS

- Not a toy. Keep away from children.
- Do not disassemble the product.
- Stop usage if swelling, overheating, or unusual smell occurs.

TROUBLESHOOTING

1. Car not starting?
 - Check clamp connection and clean battery terminals.
3. No airflow?
 - Check battery level and nozzle attachment.
2. Device heating?
 - Let it cool before reuse.
